

Philip Damwanza Ahenda

philipdamwanza@gmail.com | +254 703 289 647 | Kisumu, Kenya | kahenda.github.io | github.com/kahenda | dev.to/kahenda

Summary

Full-stack software developer experienced in Go, JavaScript, PostgreSQL and React. Built and deployed a live secondhand marketplace serving Kisumu, Kenya. Currently building an offline-first health worker tool for underserved communities.

Skills

Languages	Go, JavaScript, C, SQL
Frameworks	Gin, React, Tailwind CSS, Axios, React Router
Tools	Git, GitHub, PostgreSQL, Neon.tech, Cloudinary, Render, Linux

Projects

Kisumu Marketplace — Secondhand Clothes Platform

kisumu-marketplace-frontend.onrender.com | github.com/kahenda/market-place

- Kisumu had no digital platform for local secondhand clothes — sellers relied on physical markets and WhatsApp groups.
- Built a Go REST API with 13 endpoints covering auth, listings, messaging, reviews and image uploads — deployed live on Render.
- Built a React frontend with 6 pages, real-time filtering by Kisumu neighbourhood, size, category and condition.
- Implemented JWT authentication, bcrypt password hashing and Cloudinary image uploads.

Stack: Go · Gin · PostgreSQL · React · Tailwind CSS · JWT · Cloudinary · Render

Afya Plus — Offline-First Health Worker Visit Tracker

github.com/kahenda/afya-plus

- Community Health Workers in underserved areas rely on paper forms, causing at-risk cases to take days to reach a clinic.
- Building an offline-first PWA that lets CHWs log household visits without internet, flags at-risk cases and syncs to a supervisor dashboard when connectivity returns.
- Implemented CHW authentication, household and visit data models, and automatic risk-flagging logic in Go.

Stack: Go · Gin · PostgreSQL · React · Tailwind CSS · IndexedDB · Neon.tech

Experience

Developer Apprentice — Zone 01 Kisumu

March 2026 — Present · Kisumu, Kenya

- Completed the Piscine — a rigorous one-month peer selection process solving algorithmic and systems challenges.
- Built and shipped a full stack web application from scratch covering backend, frontend, database and cloud deployment.
- Collaborated on group projects including a Go-based forum, leading the core and database layers.
- Published technical articles on Dev.to and LinkedIn documenting real problems solved during the apprenticeship.
